

One Of a Kind

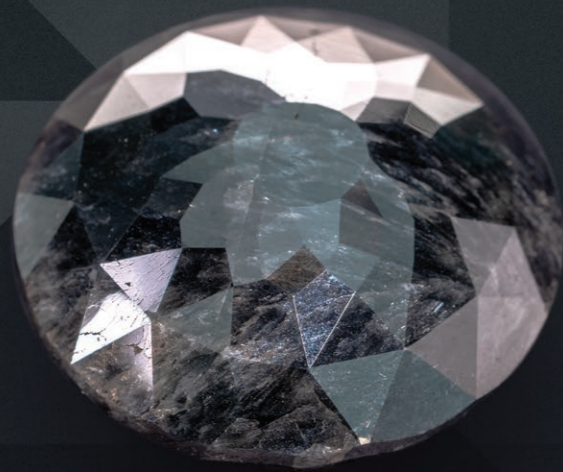

Phantom 1688, currently the third largest black diamond ever to see the light of day, is truly a gem that transcends the boundaries of our planet. Its ancient and mysterious origin is shrouded in the darkness of the universe from which it emerged.

Weighing an astonishing 168.8 carats, this diamond is akin to a black hole, absorbing all light around it, yet shining with incredible intensity. Its surface is adorned with 192 facets, reflecting light to create a mesmerizing kaleidoscope of dark shades.

Discovered in 2007 in the Republic of Sakha, it embarked on its next voyage. Phantom 1688 was meticulously cut and faceted, allowing its beauty to shine in full. This process required not only craftsmanship but also artistic vision, resulting in a gem that embodies a piece of eternity, a fragment of the universe we can now hold in our hand.

The number 1688 in its name reflects the diamond's size, weighing an impressive 168.8 carats, and speaks to its uniqueness and rarity. The number 192, representing its facets, also holds significance. In Feng-shui, the number 1 symbolizes the beginning and entirety, 9 represents longevity and masculinity, and 2 stands for harmony and balance. These meanings are also reflected in the unique character of Phantom 1688.

Phantom 1688 symbolizes our endless quest for knowledge and beauty. It serves as a reminder of our insignificance compared to the vast universe, yet also of our potential greatness when we capture a piece of that universe and transform it into a gem as breathtaking as Phantom 1688.

Investment Opportunity of a Lifetime

/ Phantom 1688

The diamond is believed to have been created when a meteorite or an asteroid hit the earth from 2.6 – 3.8 billion years ago. Phantom 1688 is a unique black diamond that reflects light like a mirror. This reflection is achieved thanks to the very special, risky, and unusual techniques of the Smolensk Cutting school.

/ 168.8 Carats

It is among the largest known natural black diamonds ever.

/ 192 Facets

It has the highest number of facets in a natural black diamond to date.

/ Alrosa Cut

The Round Modified Brilliant Cut is highly demanding, intricate, and risky. Its execution required six years of meticulous work. The „Alrosa“ grinding technique is a unique skill currently mastered by only two cutters in the world. This specific cut is characterized by several distinct features: instead of full reflections, only sparkles are visible. This trait is not found in typical diamonds and is achievable only through this special grinding method.

/ Ranking

Currently the third largest black diamond.

/ Color

Very beautiful, obscure colour with a fine pattern that can be described as Smokey Dark Gray.

/ Special characteristics

Number symbolism is very strong. By change the numbers from weight of carats is 1688 and the number of facets is 192 where each numbers is very strong one. Black diamond is probably from the space, was not created on Earth.

/ Craftsmanship

Use of unique, innovative cutting techniques
Relatively low loss ratio from raw material to finished product.

/ Origin

Very unusual place of find for a black diamond of this size. In 2007, ALROSA mined a diamond crystal weighing 253.37 carats in the Republic of Sakha, Russia.

/ Certification

Certified by most recognized experts in diamonds worldwide.

A new stone with an immaculate, clean history.
Ready to make the "road show" and start own history for next generations.

Phantom 1688 diamond stands as a testament to the wonders of the universe and the mastery of human craftsmanship. Its celestial origins and unparalleled beauty make it a once-in-a-lifetime acquisition, destined to be the crown jewel of any collection and an exceptional investment for the future. As it embarks on its next chapter, the Phantom 1688 awaits a discerning owner who appreciates its cosmic allure and the stories it holds within. The legacy of this diamond is just beginning, poised to dazzle and inspire for eons to come.
